5. Exceptions concerning the use of means of capture and killing specified in Appendix IV .....	94

## **Introduction**

According to Article 9 of the Bern Convention, contracting parties may make exceptions from the provisions of Articles 4, 5, 6, 7 and from the prohibition of the use of the means mentioned in Article 8 provided that there is no other satisfactory solution and that the exception will not be detrimental to the survival of the population concerned.

Every two years Contracting Parties (ref Art. 9.2) forward to the Standing Committee a specific report on the implementation of Art.9. Contracting parties are requested to use the standard forms for their biennial report, bearing in mind the Resolution No 2 (1993) on the scope of articles 8 and 9 of the Bern Convention.

This report provides an overview of the exceptions made in the territory of the European Union by the EU Member States during 2005 and 2006. The document is based on the national reports on derogations issued under art.9 of the Birds Directive and art.16 of the Habitats Directive, submitted to the European Commission by all 25 Member States.

## Methodology

Seventy four national reports<sup>1</sup> on derogations issued in 2005 and in 2006 (see: table on page 8), according to Art. 9 of the Birds Directive and to Art. 16 of the Habitats Directive, have been systematically scrutinised. All derogations have been scrutinised looking for species, country specific reasons or methods, allowed activities. The work has been carried out in different steps:

*a) Creation of a database*

A specific database has been created with data coming from the Birds and Habitats Directive derogation reports received from all 25 EU Member States. The database includes a total of 12.643 derogations and more than 20.000 names of species.

*b) Subdividing the species according to the Bern Convention appendixes*

All the species have been subdivided in 3 tables, according to the Appendix of the Bern Convention:

APPENDIX I	Strictly protected flora species
APPENDIX II	Strictly protected fauna species
APPENDIX III	Protected fauna species

*c) Transformation of the reasons for which the derogations have been issued from the Habitats and Birds directives coding to the Bern codes*

Derogations can be granted only for specific reasons, which have different codes in the two Directives and in the Bern Convention. The codes relative to the Convention are listed in tables 1, 2 and 3. All the codes used for the Birds and Habitats Directives reports have been transformed in the codes useful for the EC Bern report.

**Table 1.** Main standardised codes for derogation reasons relative to plant species in Appendix I of the Bern convention

Code	Reasons reported in the Model form for biennial report (2003-2004) <sup>2</sup>
A	for research/education/repopulation or reintroduction
B	for exploitation
C	for other overriding public interest

**Table 2.** Main standardised codes for derogation reasons relative to fauna species in Appendix II of the Bern convention

Code	Reasons reported in the Model form for biennial report (2003-2004) <sup>3</sup>
i	for the protection of flora and fauna
ii	to prevent serious damage to crops, livestock, forests, fisheries, water and other forms of property
iii	in the interests of public health and safety, air safety or other overriding public interests
iv	for the purposes of research and education, repopulation, reintroduction and for the necessary breeding
v	to permit, under strictly supervised conditions, on a selective basis and to a limited extent, the taking, keeping or other judicious exploitation of certain wild animals and plants in small numbers
vi	falconry

<sup>1</sup> Cyprus did not grant derogations in the biennial on species listed in the Habitats Directive.

<sup>2</sup> T-PVS/Inf (2005) 8

<sup>3</sup> T-PVS/Inf (2005) 8

**Table 3.** Main standardised codes for derogation reasons relative to fauna species (in Appendix II and III) affected by prohibited means of capture and killing specified in Appendix IV of the Bern convention

Code	Reasons reported in the Model form for biennial report (2003-2004) <sup>4</sup>
a	for the protection of flora and fauna
b	to prevent serious damage to crops, livestock, forests, fisheries, water and other forms of property
c	in the interests of public health and safety, air safety or other overriding public interests
d	for the purposes of research and education, repopulation, reintroduction and for the necessary breeding
e	to permit, under strictly supervised conditions, on a selective basis and to a limited extent, the taking, keeping or other judicious exploitation of certain wild animals and plants in small numbers

*d) Checking methods permitted*

Exceptions concerning art.8 of the Bern Convention concern the use of means of capture and killing specified in Appendix IV for :

- a) exploitation of species in Appendix III
- b) species in Appendix II subject to exception (Article 9)

**Table 4.** Standardised codes for methods.

Codes	Method
1	snares
2	live animals used as decoys which are blind or mutilated
3	tape recorders
4	electrical devices capable of killing and stunning
5	artificial light sources
6	mirrors and other dazzling devices
7	devices for illuminating targets
8	sighting devices for night shooting comprising an electronic image magnifier or image converter
9	explosives
10	nets
11	traps
12	poison and poisoned or anaesthetic bait
13	gassing or smoking out
14	semi-automatic or automatic weapons with a magazine capable of holding more than two rounds of ammunition
15	aircraft
16	motor vehicles in motion
17	limes
18	hooks

*e) Transformation of the activities allowed in the derogations, from the Habitats and Birds directives coding to the Bern codes*

Article 9 of the Birds directive and Article 16 of the Habitats directive permit exceptions only for some activities. Their coding is different from the one used in the Bern Convention, listed in table 3. Therefore, all the codes used for the Birds and Habitats Directives reports have been transformed in the codes useful for the EC Bern report.

---

<sup>4</sup> T-PVS/Inf (2005) 8

**Table 5. Main standardised codes for authorized activities**

<b>Code</b>	<b>Main permitted activity</b>
a	deliberate killing
b	deliberate damage to or destruction of breeding or resting sites
c	deliberate capture and keeping
d	deliberate disturbance of wild fauna
e	deliberate destruction or taking of eggs
f	possession and internal trade

*f) Compilation of the Bern report model*

The report has been presented using the standard model provided by the Standing Committee of the Bern Convention, furnished to the contracting parties during the meeting of November 28 – December 1, 2005 (document number T-PVS/Inf (2005) 8).

All derogations have been inserted in the specific tables requested by the model format according to the appendix to the Convention, to the derogations reason, to the activity allowed and to the method permitted.

For certain derogations the Commission has undertaken investigation in order to determine whether they are in full compliance with provisions of both Birds and Habitats Directives. Derogations which are subject to ongoing infringement procedures are not reported in the tables.

Table 3 on falconry: the national derogation reports do not provide sufficient information on this issue to compile the form adequately. This is due to the fact that the derogation model used for the report under the Birds and Habitats Directive does not require the same information requested by the Bern report. For instance “Number of birds in captivity” and “Origin of birds”.

Table 4 on fauna species listed in Appendix III of the Bern Convention: as requested in the standard model, the exceptions concerning the prohibited means of capture and killing of Appendix III species were included in Table 5.

Table 5 on prohibited means: the information provided is partial, due to missing data in the national reports. For example, it was not possible to fill in the table for several exemptions granted by DK, LT, LV and EE, because the means used are generically referred to as "BTH" (means that can be used for derogations under the Birds and Habitats directives), or "HSD" (means that can only be used under the Habitats Directive), or "scaring devices", etc.
